ten strips of 24x4 inches each for
5 cents at Review Office.

From our own Correspondent

We are sorry to report that Mrs.
Glover was taken sick last Saturday
but we hope to hear of her complete
recovery soon.

The Grossmith Concert was not a
very great success last Friday night,
it is reported but there was a very
small attendance.

Mr. Maurice Berney has taken
advantage of the fine weather to dig
his well deeper and is now down 65ft.
and touching coal. George Miller is
very kindly helping.

We are sorry to state that Mr.
G.W. Nordin died Friday morning
February 6th. at Rochester. Mr.
Martenson is taking care of the stock
and two of the children, while Mrs.
Frank Reane has the other two
children.

Mrs. Nordin left for Clear Lake on
February 6th.

Mrs. H. Honoley left for Lethbridge
last Monday.

Chancy Morey had a Card Party
and Informal Dance on Friday Febr.
20th.

Mr. Alfred Miller is sick with
rheumatism in his legs and is staying
with his brother John. Mr. John Miller
is looking after his stock.

WANTED

A boy wanted whole or
part time

Apply Bow Island Review

Mr. and Mrs. Lecheffski said Mr.
and Mrs. Mike Muller a call Sunday
evening.

Dick Edwards who rented Mrs.
Brophy's place was in town last Saturday
and was then working at Taber but
was going up to Pincher Creek. Dick
who also brought out the Dick's
machinery and horses had the bad
fortune to lose his stud horse lately.

Roy Bettie went last Monday to the
First Convention being held in
Calgary.

We expect Roy will return with a
very full budget of interesting food
news which he will obtain while at
the Convention.

NURSES ADVISE

Zam-Buk, because they have proved that it does what is claimed for it. 100 Bow Island, Alberta, Canada, 3220 Michigan Ave., Chicago, says: "I have a patient who suffers from a sore throat, and Zam-Buk is the only remedy that gave her relief."

I have used Zam-Buk myself for the same ailment, also for sores and burns, and have the greatest confidence in it."

Growing Power Of Western Canada

A recent Ottawa dispatch reveals the fact that, according to official estimates, Quebec continues to outstrip Ontario in the increase in population. It stands clear in the gap between the two provinces in point of numbers of people. This is a development which has been in progress for some years now, with the result that Ontario is efforting to make the redistribution of political power that brings the demands of political power which once enjoyed at Ottawa.

As is well known, the basis of representation of the provinces in the House of Commons is fixed by the British North America Act, which provides that Ontario shall always have 65 members, and each of the other provinces such a number as will give the same proportion of representatives to its population as the number of members to the population of Quebec, and it is also provided that following each decennial census a redistribution of representation shall take place on the basis of the population figures thus ascertained.

Prior to the census of 1901 the unit of representation for all Ontario was 22,900—that is, each group of 22,900 people was entitled to a member at Ottawa. This gave Ontario 92 members, while Quebec had only 63, a difference of 27. As a result of the 1901 census, and the increase which had taken place in Quebec's population, the unit was raised to 25,367, with the result that Ontario's representation fell from 92 to 80, becoming proportionately, Quebec's representation, which was far grand than Ontario's. Following the census of 1911, the unit was again raised, this time to 30,819, and Ontario lost four more members, and is now represented at Ottawa by 82. On the basis of the recent official representation sites, Ontario will, following the census of last year, lose at least two more members, leaving it only 80.

Thus in two decades Ontario's representation has been reduced by 12, leaving only a margin of 15 between Ontario and Quebec, as compared with 27 twenty years ago.

The same change in position is taking place so far as the Maritime Provinces are concerned. Nova Scotia, which had 20 members prior to 1901, dropped to 18 after the census of that year, and to 16 following the 1911 census. New Brunswick fell from 14 to 13, and Prince Edward Island from 5 to 4, and now to 3.

The opposite result is shown in the West. Prior to 1901 Manitoba had only 7 members, British Columbia, 6, and the Northwest Territories, 4, a total of 17. Following the census of 1901, these figures are as follows: Manitoba to 10, a gain of 3; British Columbia 7, a gain of 1; Northwest Territories 10, a gain of 6; Yukon 1—an increase of 28. Following the census of 1911, these figures were again increased, and the representation is: Manitoba 15, British Columbia 13, Saskatchewan 16, Alberta 12, Yukon 1. Total 57.

The representation of the four Western Provinces for Eastern Provinces in the House of Commons decreased by 19 in twenty years, or an average loss of a member a year, the representation of the four Western Provinces

and the Yukon has increased by 40, or an average of two additional members a year. And if the same proportionate increase in population in the West is repeated by the same extent, there is another likely judgment from the recent official estimate of Saskatchewan's population, which places it now at almost double the 1911 figure. The voting power of Saskatchewan in the House of Commons will be enormously increased, while not only relatively, but actually, that of the East will be decreased.

The effect of this growing political power of the West in the national Parliament is fraught with possibilities, including the shaping of national policies and in a probable very radical change in the financial and fiscal policy of the Dominion. This increased power of national influence is often accompanied by a strong tendency of western people not to divide upon old party lines, but to unite upon great questions of principle and policy irrespective of former party lines. This, it is believed, indicates that a new realignment of political parties is in the making, and that all former political conditions are due for a shake-up.

The incidence of population increase, therefore, is to have a profound effect upon future Canadian policy. This will be true not only as between West and East, but is markedly in evidence within the boundaries of the old provinces. Ontario is becoming more and more an industrial centre where the population of the manufacturing towns and cities are growing while the rural population is declining. Quebec, too, is, developing rapidly in an industrial sense, but that, perhaps, is not so evident. Ontario's position is, in fact, that Quebec is forging ahead of Ontario in more population, thanks to the fast-growing and aggressive good roads and agricultural policies introduced by the provincial government. As a result, the natural resources of Quebec are being more rapidly and scientifically developed than those of any other province at the present time.

Students of Canadian affairs, and particularly interested in national development, may well follow with exceptional keenness the changes now being wrought in all national, financial and economic policies as the direct outcome of western development and growth in population, influence and political power.

Cataract Deafness Cannot Be Cured
by local applications, as they cannot reach the ear canal. The only way to cure Cataract Deafness is to have the eye removed. HALL'S CATARRH MEDICINE, through the glass on the Moxibustus sticks, will bring about a marked improvement in the condition of the sinus membranes. If the sinus membranes are inflamed you have a running nose, or a headache, or a toothache, or a bad cold. Doctors are of the opinion that the sinus membranes are inflamed in the case of cataract deafness. The eye can be removed, and the sinus membranes will be removed, and the eye will be restored to its normal condition, hearing may be restored. The sinus membranes are not caused by Cataract, which is an incurable disease.

ONE HUNDRED DOLLARS FOR ANY CURE
will be given to the person who can cure HALL'S CATARRH MEDICINE.

How Frost Affects Foods

On a cold day when it is frosty and breaks its shell. Apples contract

so much that a full barrel will shrink until the top layer is a foot below the chin. When the frost is drawn from the apples, the top layer will shrink and fall the barrel again. Certain varieties are not appreciably injured by being frosty if the frost is drawn out gradually. Apples will not grow when the temperature is below 32° F. and the frosty layer is 10° F. below the ground. When the frosty layer is 15° F. below the ground, the apples are easily ruined. Once touched by frost they are ruined.

A keeperless Lighthouse

Small Beacons Have Greatly Altered Their Seats in Alaskan Waters

Along the coast of Alaska, it would be difficult to maintain reliable lighthouse keepers, there have been established many automatically flashing beacons, each of which is operated for nearly months, on our shore gas. A keeperless light-keeper, alone among the widest of scenery, is always a romantically interesting mark of progress. A light-house without a keeper, however, is not a mark of progress, but of progress, in that it is not necessary to stay from the temporary necessity of staying where he might not want to. At first some navigators were a little afraid in getting use to the flashing lights. Because of the way the light of the flame, one might hardly know whether he was coming to, or going from such a light. In the end, though, these small beacons, which cost about \$1,800 each to install, greatly aided navigation in Alaskan waters.

The Sweet Cereal Flavor of Grape-Nuts

is not produced by adding sugar to this blend of wheat and malted barley.

This sweetness is due to ac-
tual grain sugar, self-developed
by the processing and long baking of this great food.

Clear Your Scalp and Skin With Cuticura

After shaving and before bathing touch hand or irritation, if any, with Cuticura Ointment. Wash all of the scalp with Cuticura, applying plenty of Soap best applied with the hands. One Soap for all uses is Cuticura. Use Cuticura. Finally dash shaven parts with Cuticura lotion. Use the Soap, Ointment and Talcum, gold, perfume.

New German Postage Stamps

Imperial and State Authorities Are Obligated to Pay Postage

At one time every member of the various reigning houses in Germany had the privilege of sending free postage. The revolution has done away with this privilege. All the princes are obliged to pay taxes and to affix stamps upon their letters like every other citizen. The government has now abolished this, providing that imperial and state authorities are also obliged to pay postage. Until now they had been exempt from this obligation. The Post Ministry has already ordered that the postage be paid, introduced solely for the use of the authorities. They bear the imprint "Reichsdruckmarke" (stamp for imperial service), and the stamps for the federal states the imprint "Dienstmarke" (service stamp).

Samples of Alberta Minerals for England

Alberta Natural Products to Be Put on Exhibition in London

Samples of the bitumen sands from Fort McMurray, natural tar products from the sands, gasoline extracted from natural gas, natural gasoline, crude oil, salt, gypsum, sand, some briquettes from Bankhead, coke from the Crown's Nest, and some other of the Alberta natural products were this week sent to the "Cob" (London office) of the Canadian Government for Canada in London, England. These are to be put on exhibition at the London office and will be added to from time to time as the material comes to hand.

Alberta Glass Factory

New Addition Will Be Larger Than the Original Plant

Good progress is being made on the large extension to the glaze factory at Redcliff, Alberta. The site is constructed and the building is well advanced. Experts are on hand to install the furnaces and leads, which when completed will be as large as any on this continent. This new addition will be larger than the original plant, which is expected to be in operation some time in March.

The plant is owned by the Dominion Glass Company, and was originally established at Redcliff seven years ago.

Leveruline Favors Prohibition

Lord Leverhulme, the British manufacturer, who has returned to England from a two months' visit to the United States, has expressed his opinion in favor of the adoption of prohibition in Great Britain, through which, he said, enough could be saved to pay Britain's indebtedness to America within five years.

STORMY WEATHER HARD ON BABY

The stormy, blustery weather which we have been drowsing February and March is extremely hard on children, especially on babies, whose mother to keep them in the house.

They are often confined to overheat rooms, which are liable to catch colds which rock their whole system. To guard against this a box of Baby's Own Liniment, which is a liniment for the house and an occasional dose given the baby to keep his stomach and bowels in order, will be of great service to any mother who is nursing a baby.

Some people sin a lot of times by telling the truth.

What is the Substitute

(From a Recent Speech by the Hon. A. J. Balfour)

"The League of Nations has had many critics, but I am not aware that among the multitude of criticisms, any one has ever suggested that our organization makes its appearance and suggestion more difficult for finding a substitute for that organization, which we desire to see intrusted, I admit, with the great task of preserving the peace of the world. Those who will not be satisfied with the League of Nations, I have no substitute for the League of Nations. They are prepared, it seems, for the civilized world to go on in the future as it has gone on in the past, in conflicting between those who are of different creeds, and among different races, and among different classes, and in the interests of different nations.

It is expected that the League of Nations will be of great service to the world, and that it will be of great service to the world.

It is expected that the League of Nations will be of great service to the world.

It is expected that the League of Nations will be of great service to the world.

Returned Soldiers

4 Edward Street
Toronto, Ontario.
January 29th, 1920

To the Editor:
Bow Island Review.
Dear Sir:

I enclose copies of the petitions which are being circulated throughout Canada to aid Returned Service Men and dependents of deceased comrades in securing an increased bonus from the Canadian Government.

You will notice that one is to be signed by civilians and the other by men who have seen service in any capacity. In places where regular petition forms have not been distributed, people are requested to cut out the petition as it appears in the local paper, get some blank paper and add their names and addresses, and if services men the name of the battalions they served with and forward same to me.

It will be much appreciated if you will print these petitions in your paper. Anyone wishing for further particulars are requested to write to me for same, at the above address.

Thanking you,
Yours sincerely,
M. N.

Secretary Round Table Conference Representing: Naval Veterans' Association; The Originals Club, Grand Army of Canada, United Veterans' League, The Army and Navy Veterans in Canada, and His Majesty's Army and Navy Veterans' Association.

Petition for Civilian

In addition to the petition which is being signed by those who took part in the Great War, another petition is being circulated amongst civilians for their co-operation. We publish below a copy of this petition. Civilians everywhere are signing it, and if you are a civilian you are asked to add your name to the list and to get others to do the same. If you wish further particulars write to the Grand Army of Canada, 18th Street, Toronto.

Civilian's Petition

To the Honorable House of Commons, in Parliament Assembled. The petition of the undersigned Electors of the Dominion of Canada humbly showeth:

That the Dominion of Canada owes a great debt of gratitude to all those who enlisted in the Canadian Services during the Great War.

That those who enlisted in these services were not inspired by mere motives to join a necessary army hired to serve an arbitrary power of the State, but were called forth by the declarations of Parliament to defend their own, and the liberties of the British people, and to maintain those just and equitable laws and constitutional under which peace and happiness have been assured to them by the wisdom and valor of their ancestors.

That those who so enlisted, when ever called upon, in a true spirit of sacrifice, acquitted themselves to the honor and glory of their country with the result that the exceptional discipline and training of the Canadian Forces has been recognized as not inferior to that of any other nation that served in the war. They gave abundantly for any position gained or entrusted to them; they never failed to gain or carry any objective assigned to them. They were the leading shock or storm troops of the Allies and during the whole course of the war they never lost a single gun.

That it is recognized that such services cannot be measured in terms of money, and it is not the wish of those who served that it should, still they suffered certain disabilities during their terms of service, which Parliament, representing the whole people, is in duty bound to remove.

That it is desirable that nothing should be left undone to re-establish those who have served, and to place them in a position equal to that which they might have been expected to attain had they remained from Active Service and remain'd at home, pursuing their customary vocations.

That in view of the abundance of wealth and revenue of the country, it is considered that the most effective way in which satisfactory re-establishment can be accomplished will be

to grant a cash bonus on the following basis:

"My Petitioners therefore humbly pray:

That in order to re-establish these officers, non-commissioned officers, men and women who have enlisted and served in the Canadian Expeditionary Forces at home or abroad, who having been resident in Canada before or during the Great War of 1914-1918, served in any branch of the Allied Forces and to place them in a post-war position to which their services justly entitle them, a cash bonus be given on the following scale, viz:

\$2,000.—To officers, N.C.O.'s, men and women who served in France or any other zone of active warfare.

\$1,500.—To officers, N.C.O.'s, men and women who served in England or on fortress duty.

\$1,000.—To officers, N.C.O.'s, men and women who served in Canada

\$2,000.—To officers, petty officers and ratings in the Naval Service who were engaged in lightships and patrol duty.

\$1,000.—To officers, petty officers and ratings in the Naval Service on duty in Canada only.

That a cash bonus based on the rating as the above be paid to the parents, wives, children or proven dependents of deceased sailors and soldiers.

And as in duty bound your petitioners will ever pray.

Soldier-Sailor Petition

To the Honorable House of Commons, in Parliament Assembled.

The Petition of the undersigned, represented by the Naval Veterans' Association, The Originals Club, Grand Army of Canada, United Veterans' League, The Army and Navy Veterans in Canada, and His Majesty's Army and Navy Veterans' Association.

That they accomplished with distinction and honor the tasks they set out to perform.

That their deeds of valor have raised the Dominion of Canada to the status of a Nation and have secured for the Dominion a place in the League of Nations.

That they should be re-established in Civil Life to a position commensurate with the sacrifices made.

That the physical condition of thousands of them makes it impossible to compete with those who never saw service in the fighting.

That they voluntarily gave up home, position, prospects of ordinary commercial success and advancement for service in the Navy or Army.

That they accomplished with distinction and honor the tasks they set out to perform.

That their deeds of valor have raised the Dominion of Canada to the status of a Nation and have secured for the Dominion a place in the League of Nations.

That they should be re-established in Civil Life to a position commensurate with the sacrifices made.

That the physical condition of thousands of them makes it impossible to compete with those who never saw service in the fighting.

That in view of the methods of systematic production which have been introduced into the Canadian industries during the War, a vast majority of them find themselves unable to meet the demand for 100 per cent efficiency.

That having returned home they find the best positions taken by those who remained behind.

That thousands of them are unable to find suitable employment.

That through the high cost of living the dependents of those who have returned find themselves at a considerable financial disadvantage as compared with those who stayed at home.

That the dependents of the fallen find themselves in a similar position with the additional disadvantage of having lost their bread-winner, or their growing sons, upon whom they looked with confidence for support in the coming years.

That many aliens have established themselves in business during the war while their petitioners were fighting for the very existence of the country, and in order to do the same they lost sustenance while serving their country they are unable to compete with these aliens.

Your petitioners therefore humbly pray:

Bow Island Review, Bow Island, Alberta February 13th, 1920.

THERE IS ONLY ONE POSSIBLE WAY

For you to reduce your living expenses and that is, you must buy your goods cheaper. Through this paper we shall endeavor to keep you posted as to a few of our prices from time to time, and will surely be to your advantage to Watch this Space.

S. B. GOOD
HIGH CLASS GROCER. BURDETT

Winnifred

From our own Correspondent

We must say that we think little Donald Freeman is getting quite a business man these days, he will be father's right hand son

The many friends of Mrs. Alfred Lassen are pleased to learn of her little daughter's speedy recovery

Mr. G. E. Loken south east of Winnifred traded his 32 acre farm for improved land at Southernlin Valley Oregon

Bob, Smith and V. Olday returned from the woods this week they have been in Montana since last fall.

Mrs. Jas. Castle spent a few days visiting in Medicine Hat this week.

Mr. Fred Raadisher rented his farm to Mr. Earl Bryant, he took possession Feb. 2nd. Mr. and Mrs. Raadisher intend to make Medicine Hat their home.

Harry Petro was taken to Medicine Hat Hospital with symptoms of influenza, Frank Baker was elected to accompany him to the Hospital

Mrs. J. W. Dennison spent the week end at Medicine Hat.

Many surprise parties are being stopped during so much sickness in order to check the spread of sickness as those they call upon are in fear.

The Red Cross will hold a free Entertainment and Box Social in L.O.P. Hall Saturday evening February 16th. Boxes not to go higher than \$1.00. Concert beginning at nine o'clock everybody come and have a good time

The Ladies Aid will meet at the home of Mrs. Harvey Davis on February 16th. Mrs. J. W. Dennison will assist in serving.

Every member is requested to be present, the numbers are arranging an entertainment to be held in the near future.

We are pleased to report the satisfactory progress of Mrs. Geo. Scott and son, who have been seriously ill with pneumonia.

The many friends of Mrs. I.C. Freeman are pleased to learn of her speedy recovery from her sickness.

Mrs. J. F. Lanoreaux traded his 820 acre farm south of Winnifred for a valuable orchard tract of Southernlin Valley Oregon land.

The U.F.A. and L.F.W.A. are taking about holding joint meetings and only a few favos the suggestion, the fact is many will try to check the plan.

Mr. Swennumson
Returns from Advance
Rumely Dealer's School
in LaPorte, Indiana.

Mr. Swennumson just returned from the advance Rumely Thresher company's dealers school at LaPorte. He states that he spent a most profitable and pleasant two weeks as the guest of the OilPull company. We will let him tell his own story.

On arriving at LaPorte, we registered and were assigned to rooms with private families in town giving a little touch of home life which only a stranger in a strange land knows how to appreciate.

The school was run much like a large university with regular lectures and laboratory classes running from \$800 in the morning until \$500 at night. Lectures were given by some of the best engineers in the automotive industry. After the lectures we would put on our "overalls" and go into the laboratory and work on the machines. There was an enthusiastic group of men working on motors, transmission running tractors etc. We had altogether, some 250 leaders from all over the United States and Canada.

Upon a Mr. Rosinen, came all the way from Stockholm, Sweden to attend the school. He represents a company in Stockholm which handles the Rumely Line in Scandinavia Russia and Poland.

We studies to through the entire plant, spending a half day in the OilPull and the same amount of time in the Separator factory. Believe it is a whale of a plant. The factory alone covers over 85 acres and employs over 2,000 men. Everything is well organized and things sure do run through in a systematic thorough way.

The spirit within the Advance Rumely organization is another thing that impressed us. There is a strong sense of loyalty prevailing throughout the whole works which makes the organization seem like one big family. Another instance of this spirit is shown in the Advance Rumely club which is made up of the Rumely workers. They have a two-story brick building which they turned over to dealers. We spent many pleasant hours in the writing room, reading room, and billiard room, which were so kindly put at our disposal.

The club room was fitted up with a regular stage and everything. We had some great entertainments brought down from Chicago. One night we had the Imperial Quartet which makes records for the Victor company.

Another night we had a boxing entertainment. A regular vaudeville show from the best circus in Chicago made a big hit. There was a cancan girl who came down off the stage and kidded us. We will remember that quite a while. After the show there was dancing fixed up for us so that we could get acquainted with the Rumely girls.

The climax of the entertainment was the banquet given at the Masonic hall by the Rumely company as sort of a farewell party. Some "feed" I claim. During the meal we were entertained by more cabaret—this time by a Hawaiian Duke dancer and an Hawaiian orchestra.

Mr. Swennumson is more enthusiastic than ever about the company and its product and states that he is now in a position to give a personal service to his customers that can't be beat.

Piano Tuning
Organ and Piano Tuning, also repairing. Terms reasonable. Work guaranteed satisfactory.

Planning Work of 1920

The need of bringing the volume of production from the fields, the forests, the fisheries, the mines and the industries of Canada to the highest possible point this year, and in succeeding years, is so clearly recognized by students of world finance and economics that it is not to be wondered at that the Canadian government is greatly increasing the pool of greater production. There is, however, one reason why much more production will not be good business for Canadians, individually and collectively, in 1920. Not only are they assured of adequate market and food supplies when they can produce but there is a general feeling among experts that will enable them to buy more cheaply abroad. Canadians, of necessity, must buy largely in the United States. We buy far more from that country than we sell to it. To meet that situation, export taxes that the United States fail to balance our imports from that country we must pay in good hard cash. Because of the adverse balance of trade against us the cost of living will be correspondingly higher than it is at present. That it takes about \$10,000 to \$11,000 of Canadian money to pay for every \$100,000 worth of goods purchased by Canada in the United States. This necessarily increases the cost of everything we buy, from the services of the Canadian farmer. It increases the price of pay for machinery, for oil, for boats and shoes and clothing.

By increasing production of those things from our farms, forests, fisheries and mines, we can increase our exports and thus remove this handicap which is now operating to the disadvantage of our people in the matter of their standard of living. It will mean a very substantial increase in the protective customs tariff would operate.

These are purely business and economic matters to be taken into consideration, not only by farmers, but by all producers in Canada in the planning of their work for the year which is now entered.

Nasty Throat Droppings
Catarach Discharges
Quickly Cured

Doctors recommend Catarach; it is nature's own remedy for the germs, heals sore spots, cures warts, ulcers and Catarach pains. You send the Catarach to the pine woods, the richest balms and balsams, and you will be right to the cause of your cold by inhalation. Little drops of wonderful curative power pass through the whole breathing apparatus and purify the breath. Like a miracle, that heals bronchitis, bronchitis, catarrh, colds and irritable lungs. It removes the breath, breathes in its healing fumes, and every time you use it you feel as before first.

So safe, infants can use it to relieve, doctors prescribe it, so leniently that you can afford to do without Catarachalone.

Used in thousands of cases, it has cost only \$1.00, lasts three months, and is guaranteed to cure; smaller size 50c.

Address, the Catarachalone Co., Kingston, Ont.

Building genius doesn't always bear fruit.

Czechs Do Not
Want Charles
He Refuses \$500,000 Job Offered By
American Paper

Former Emperor Charles of Austria and Empress Zita are held of remaining in Switzerland, according to a telegram from Vienna, and have applied to Czechoslovak Government for permission to reside in Prague. The request was refused for political reasons.

One reason given for the request is that owing to the low rate of exchange in Switzerland the former royal couple are receiving only one-tenth of their income from Vienna. Empress Zita is reported to have been forced to sell more of her jewelry than she had ever done before.

Another reason is that the former emperor \$50,000 for his reminiscences; but, although financially embarrassed

RHEUMATIC PEOPLE

Can Only Find Relief By Enriching
the Blood

Rheumatism is a disorder of the blood. It attacks the joints when the blood is overcharged with acid and impurities, thus setting up inflammation, pain and stiffness. The cold weather or cold weather of autumn may start the tortures of rheumatism, but the heat of summer may bring on the disease. The blood and the blood only, victims of this malady, have every reason to complain. The blood is the life of the body; it takes about \$10,000 to \$11,000 of Canadian money to pay for every \$100,000 worth of goods purchased by Canada in the United States. This necessarily increases the cost of everything we buy, from the services of the Canadian farmer. It increases the price of pay for machinery, for oil, for boats and shoes and clothing.

By increasing production of those things from our farms, forests, fisheries and mines, we can increase our exports and thus remove this handicap which is now operating to the disadvantage of our people in the matter of their standard of living. It will mean a very substantial increase in the protective customs tariff would operate.

These are purely business and economic matters to be taken into consideration, not only by farmers, but by all producers in Canada in the planning of their work for the year which is now entered.

Nevertheless, no intelligent farmer will do otherwise than welcome information from authoritative sources indicating the importance of oil production now given to farmers by the stock producers, and others engaged in various branches of food production. Like all good business men, the farmer must welcome information regarding the industry in which he is engaged.

Since writing the article which appeared in this column last week, certain events have transpired which only add force to what was there stated. Dr. William Williams, president of the Canada's Food Board during the war, has returned to Canada after spending eight months in England, with the Canadian Trade Commission, bringing back information as to the food products in the Old Land. Mr. Thompson is of the opinion that the farmers and livestock producers of the Dominion have the chance of their lives to establish a market for their products all over in the British markets. Canadian bacon, he says, has established itself there and commands a better price than the United States product. Of beef, the United Kingdom imports 1,000,000,000 pounds a year, and Canadian exports were increased, if Canadian exports were increased, twenty times it would only just fill British requirements, not to speak of the great continental European markets which are probably to be opened this year. In 1920, he reports, Great Britain will require two and a half billion eggs, while the largest export from the Dominion in any one year only totalled forty-five million.

With the opening of the wheat shipments to the United States has been raised by the Washington government, and one of the immediate results is the sale of many millions of bushels across the line by the Canada Wheat Board, and the raising of the

oil development prospects through investigation of oil possibilities in the Western Provinces.

Since the termination of the war, resumption of interest and activity in oil discovery and development throughout Western Canada has been very keen. Oil was first struck in Alberta in October, 1910, and in November, 1913. In the Alberta fields, particularly in the Calgary Glotoks sector, where for some years there have been many wells, there has been a period of relative quiet, but as oil production developed during the summer, with notable results in the striking of oil in a new well on the Alberta-Illinoian holdings near Nanton. This well is producing from 40 to 60 barrels a day and increasing rapidly in capacity.

The Imperial Oil Company, which for the past few years has had the best geologists and oil experts available, has made a number of new discoveries, reports to investors, to invest \$2,000,000 in the introduction of drilling outfits, and commencing on twelve wells covering various sections of the country from the Glotoks field to Peace River.

Alaska's Mineral Production

An advance statement by the Geological Survey gives the mineral products of Alaska for 1919 at \$18,850,000, and for 1920 at \$20,000,000, and since 1880, which marked the beginning of the mining industry in Alaska, the gold produced has totalled \$437,400,000.

Minard's Liniment Cures Gargle in Cows.

Women Prove Endurance

Earned Distinction Plowing Land
Men Relaxed to Touch

The war has revealed surprising manual dexterity and often unexpected strength in many women. Among the English Land Army girls decorated by Princess Mary is a high proportion of midgets and dwarfs. Naturally the work is hardy, and demands the sturdiest endurance. One woman, however, earned distinction by plowing Cumberland which men refused to touch. In an English county, women have been won by three women on difficult, sloping ground; while the tractor average of another, working strenuously for sixteen months, doubled that of the men. A very fine record, and one which shows that, when the necessity arises, English women are as handy in the fields as their French sisters.

By Their Taste

"What kind of pie is that?" a patient asked, pointing to an open pie face of mysterious composition. The small son of the proprietor, who was waiting on the patron, stuck his thumb into the edge of the pie, licked it, and replied, "It's a pumpkin pie." "I think that's fine. It must be like a little old-fashioned town where one still can recognize a restaurant pumpkin pie by its taste!"—Exchange.

Third-Rail System
In Belgium

Will Be Employed Except in Switches

The Belgian Railroad Department is actively continuing its program of electrification, the first line to be tried being that between Antwerp and Brussels. The experiment will be made on a passenger service. A subsidiary of the Belgian State Railroads of Railroads, has decided on the style of cars to be used and contracts will soon be ready. The third-rail system will be employed except in switches, where the third-rail system is considered too costly. The actual trials are not expected to take place before the end of 1921, owing to the amount of work which has first to be accomplished.

DON'T NEGLECT A
RHEUMATIC PAIN

Go after it with Sloan's Liniment before it gets dangerous

Apply a little, don't rub, let it penetrate, and—good-by twinges! Sloan's Liniment cures stiffness of joints or muscles, lame-ness, bruises.

Liniment without oilness or soiled clothing. Reliable—the biggest selling liniment year after year.

Use it now, before the cold weather comes again.

Keep a big bottle ready at all times.

Ask your druggist for Sloan's Liniment, \$2.00, \$1.50, \$1.00, \$0.50.

BURDETT

From our own correspondent

Mr. Salvage of Grassy Lake is a regular visitor to Bow Island these days we wonder why?

K. Brown who has been under the weather for some days past, is now greatly improved.

A party of visitors from Grassy Lake attended the Masquerade Ball at Burdett last Friday.

Prizes were won by Miss. Sewell, Mildred Maxwell, Rex Colpman, Alice Pool, John Donaldson, John Hamilton and last but not least Giles Lyons.

Wm. Perry of Bar UX Ranch was a business visitor to the county seat, to which place he went to consult the Doctor our local Physician having run out of Blank Forms.

Miss M. Batterbee who has been visiting Mr. and Mrs. Lumbard has returned to her home in Chin.
